TRANSPARENT RANKING: Top Universities by Google Scholar Citations

Fourth Edition (July 2017 version 4.01 beta!)

Last year we used the **institutional profiles** introduced by **Google Scholar Citations** for providing a ranking of universities according to the information provided for the groups of scholars sharing the same standardized name and email address of an institution. The total

number of individual profiles in GSC is probably close to one million, while the number of these universities profiles is over 5000. Google Scholar is working for extending the world coverage of the institutional profiles to (almost) all the academic organizations. Unfortunately their resources are limited and there is no final date for finishing the task. We are still committed to the use of this key source, so we decided to collect the same data (citations) in the same fashion (**top 10 excluding the most cited**) for the lists obtained from filtering GSC profiles by the institutional web domains used in the Ranking Web.

This ranking is an experiment for testing the suitability of including GSC data in the Rankings Web, but it is still in beta. The current methodology is simple:

1. The institutional profiles are used if available. The universities still lacking profile are scanned using their email address domain. We strongly advice to use **normalized (official) name** of the university in the affiliation and the **INSTITUTIONAL email address**. We identified at least 5 institutions without GSC institutional profile and with email servers different to their main web domain that has been excluded: *Medical University of Lodz; Universidad Nebrija; Université de Sfax; University of Charleston and Université Cheikh Anta Diop de Dakar.*

2. Data from the top 10 public profiles of each university are collected. This number of profiles is for allowing size independent comparisons. The first profile of the list is NOT COUNTED for improving representativeness. For the rest of the top 10 (maximum 9 profiles) the number of citations are added and the institutions are ranked in descending order of this indicator.

3. If there are several entries for the same author, only the best profile is used. That behavior penalizes organizations that are not cleaning duplicates from the list. **Non individual profiles** (journals, departments, groups) are EXCLUDED, that means the number of entries computed are reduced. Entries without author names in roman characters can be excluded, so please include transliterated version with the name in local alphabet. Don't add degrees, academic positions or department affiliation after the name.

4. If profiles of authors not belonging to the University are added intentionally to increase its rank, the institution will be EXCLUDED of the ranking. Any information regarding this bad practice is welcomed.

5. If there are at least 2 **unclean profiles with papers not signed by the author**, the University is EXCLUDED. Any information regarding this bad practice is welcomed..

6. The figures **are valid only at the time of collection** (around **July 2nd-4th 2017**) . We don't comment on the numbers or absences. To set up an personal profile in Google Scholar Citations database is voluntary, but once made it public the responsibility for info correctness belongs to the author. GSC automatically updates the profiles that is very practical but that sometimes adds non-pertinent records and citations to the profile. Authors should be aware of these issues and clean their profiles periodically. Also institutions should monitor their members profiles for intended (or unintended) fake, incorrect or duplicate records. This is key for the ranking as any institution with at least one of these problems can be excluded from future editions of the ranking. **Please, contact directly with Google Scholar for any aspect related with its database or profiles.**

Important: The Transparent Ranking values are used as the Transparent (Openness) indicator of the future Ranking Web 2017 edition scheduled for late July.

This version consits only of Top entries, but we will use non-zero values for more than 9500 institutions
Please contact us regarding errors or corrections before the publication of the parent Ranking
